

RH202

RH202 Red Hat Certified Technician (RHCT) Certification Lab Exam

Exam Description

The RHCT Lab Exam is bundled with RH133 Red Hat Enterprise Linux System Administration, but may be taken separately. Prospective enrollees in RH202 should consider taking RH035 and RH133 in preparation for the exam, but these courses are not required in order to take it. Candidates are also advised that real world system administration experience is an important aspect of preparation for the exam, and that study without such experience is unlikely to result in success.

Target Audience

- Individuals who have taken multiple choice Linux certifications and wish to add a performance-based certification to their credentials
- Individuals who have taken RH133 and/or RH253 prior to Red Hat's offering the RHCT Certification
- Individuals who have taken the RH302 Red Hat Certified Engineer Rapid Track Course who might not be ready to undertake the RHCE, but believe they are prepared to take the RHCT
- Experienced Linux and UNIX system administrators whose job roles do not involve configuration of networking services and security
- Individuals working for OEMs that factory-install Red Hat Enterprise Linux
- Individuals who wish to earn an RHCE and view RHCT as a milestone on that path

Prerequisites

Please refer to the RHCT Exam Prep Guide at www.redhat.com/training/rhce/examprep.html. You may also want to review the detailed outlines for the RH035 and RH133 course.

** The skills and practical knowledge in the outlines above are important! Participants arriving without a large portion of these skills and without up-to-date experience will be unlikely to pass the certification exam. Please do not sign up for RH202 unless you are experienced with Red Hat Linux system administration.*

Exam Contents

The RHCT Exam is a performance-based practical exam on a live system comprising:

Section 1: Troubleshooting & System Maintenance (1 hour)

Section 2: Installation & Configuration (2 hours)

To pass, candidates must:

1. Complete all requirements in Section 1
2. Score above 70% for Section 2

Duration

Half Day (3 hours)

Upon Successful Completion

The delegate will be a Red Hat Enterprise Linux system administrator who is able to install & configure Red Hat Enterprise Linux; understand limitations of hardware; configure basic networking and file systems for a single system attached to a network; configure the X Window System; perform essential Red Hat Linux system administration; configure basic host security, set up client-side networking services required to attach to a production network, and carry out basic diagnostics and troubleshooting. He or she will be "ready from a technical point of view for professional responsibilities in installing, configuring, attaching and supporting Red Hat Enterprise Linux systems for common uses"

Assessments & Certificates

- RHCT Certification Lab Exam
- Red Hat Certified Technician (RHCT) Certificate
